

## PHAZOR CLEAR

### LABEL AND HARD TAG TRANSCEIVER

#### FEATURES

##### **Radio Frequency**

##### **Processor Controlled**

##### **Transceiver**

##### **Multiplexed Antenna**

##### **Hard and Soft Tags**

##### **Wide/Multiple Aisle Capability**

##### **Easy installation**

##### **Open Architecture**

##### **Rugged Design**

##### **Power Supply**

#### BENEFITS

Proven the most versatile and reliable Electronic Article Surveillance system on the market today.

Newest DSP (Digital Signal Processing) techniques combined with the Automatic Resonance Control and Frequency select features improve detection while minimizing phantom alarms.

All the electronics are on a single circuit board, improving reliability and reducing cost, for the same exit/entry configuration.

Multiplex antenna improves the detection rates of paper labels and hard tags.

Compatible with all 8.2 MHz hard tags and labels.

No interconnecting cable required. Improves overall appearance. Reduces installation time.

Designed for ease of installation, minimizing initial costs.

Less obtrusive design does not intimidate customers, creating a better shopping environment.

Extremely durable and aesthetically pleasing clear panel that will enhance the beauty of the stores interior.

Compatible with electrical requirements worldwide.
